DAOS THE LIGHT WALK

COMPARISON OF THE DAOS BAREFOOT SHOES LENGTHS TO THE REGULAR EU MARKET NON-BAREFOOT AVERAGE:

The sizes 35 & 37 are both for men and women 0,2 cm larger in length than the EU market average.

The sizes 38, 39, & 40 are both for men and women 0,5 cm larger in length than the EU market average.

The size 41 & 42 is equal to a size 41 & 42 for women and is 1,0 cm longer than the EU market average for men.

The size 43 is 0,4 cm longer for women and 1,4 long cm longer for men compared to the EU market average.

The size 44 & 46 are 0,5 cm longer for men and women compared to the EU market average.

If your feet are narrow it's in general advised to try a smaller size than usual.

The DAOS shoes cover the step- in as a glove. People with a high step-in can have difficulty fitting on the DAOS shoes. They are advised to use the shoes several times without an insole and use a shoe spoon to fit the shoe on. The shoe itself is very flexible and the leather and elastic in use will provide the desired space.
